

Language barriers with your patients?

InHarmony Changeable Glassboards allow you to easily change out the rigid insert to showcase different languages - one on the front, one on the back.

Different care plans for different patients on same floor?

Space in hospitals is at a premium. InHarmony boards allow you to showcase different information based on patient needs in the same room.

Going through a rebranding or merger?

You may need new boards now, but know you may be rebranding or merging with another facility. Keep the glass in place, and you can purchase additional inserts to reflect new branding.

Worried about cleaning your boards between patients?

All VividBoard's can be cleaned with hospital-grade cleaners, including Virex, without harming the writing surface. InHarmony Glassboards provide a naturally antimicrobial surface.
