Why Patient Room Boards?

Healthcare, as an industry, is filled with technological advancements. When pushing for more efficiencies, innovation, and patient satisfaction, sometimes simple yet effective solutions can be overlooked.

As simple as they may be, our research shows a properly designed dry erase board can help improve patient satisfaction and HCAHPS up to six points; it also encourages patients to become more involved in their own treatment. Keeping nurses, patients and family members included in the care plan encourages patient engagement, increases patient understanding and improves overall satisfaction.

At VividBoard, we pride ourselves on being the experts in patient room whiteboards. VividBoard communication dry erase boards are found in healthcare facilities across the country in patient rooms, nurses' stations, pharmacies, operating rooms and behavioral health facilities.

Why Healthcare Chooses VividBoard

Configurable

All products are produced to your exact specifications with your branding.

Easy Clean

We have tested and approved many cleaners and disinfectants for use on our boards.

Long Lasting

All VividBoard products carry a limited lifetime warranty against ghosting and fading.

Vivid Graphics

Our photographic imaging process transforms dry erase boards into interactive communication tools. The design becomes the surface of the board making every inch usable.

Sustainable

VividBoard is focused on the environment. We use up to 70% of recycled materials, our coating and printing process is VOC free, and we are CARB compliant.

Made in the USA

We're proud to be made in the USA. All VividBoard products are manufactured in Lebanon, Ohio and delivered nationwide.

Change Made Easy

InHarmony Changeable Glassboards are the solution when the ability to easily change care plan communications are needed.

InHarmony features double-sided inserts, plain or designed glass writing surface and marker storage integrated into the track system.
